

Bicycle Brake Pad Set

These bicycle brake pads ensure reliable stopping power for enhanced safety. They feature durable construction for consistent braking performance in various conditions.

Overview

High-Performance Bicycle Brake Shoes

The DM-ZP108A bicycle brake shoe is engineered for riders who demand optimal stopping power and long-term durability. Designed with robust construction and precision components, this brake set ensures reliable performance across a variety of weather conditions. It offers excellent modulation and consistent braking force, providing enhanced safety and control for a wide range of bicycle models.

Specifications

Model Number	DM-ZP108A
Product Type	Bicycle Brake Shoe

Features

Key Features

- High-performance design
- Optimal stopping power
- Durable construction
- Weather-resistant performance
- Easy installation
