

Bicycle Brake Shoe with Mounting Hardware

This bicycle brake shoe is engineered for optimal stopping power and lasting durability. It features a rubber compound that ensures consistent braking performance across different weather conditions.

Product Overview

High-Performance V-Brake Shoes

These bicycle brake shoes are engineered for optimal stopping power and durability across various weather conditions. Designed with a robust rubber compound, they feature heat-dissipating channels that effectively reduce braking noise for a smoother, quieter ride. The set comes complete with essential mounting hardware, making it a versatile choice for both road and mountain bike maintenance.
