

Bicycle Caliper Brake

This bicycle caliper brake is engineered for reliable and consistent stopping performance. Its durable construction is suitable for various bicycle types and ensures longevity.

Product Overview

High-Performance Caliper Brake

This bicycle caliper brake is engineered for reliable, consistent stopping power across diverse riding conditions. Constructed with durable, steel-reinforced resin, it is built for longevity and dependable performance. The design includes dual spring tension adjustment, making it easy to install and fine-tune for optimal braking efficiency on various bicycle types.

Technical Details

Material	Steel-reinforced resin
Adjustment Features	Dual spring tension adjustment
Model Identifier	BK-707003
