

Bicycle Cassette Hub with Quick Release

This bicycle rear wheel hub is designed for use with a cassette. It features a quick-release skewer for easy wheel removal and installation.

Overview

High-Performance Cassette Hub

This bicycle rear wheel hub is engineered specifically for cassette-based drivetrains, offering reliable performance for various cycling applications. It features a robust design with a silver hub body and a black cassette interface, ensuring both durability and compatibility. Equipped with a convenient quick-release skewer mechanism, this hub allows for rapid wheel removal and installation, making it an ideal choice for maintenance and transport.
