

Bicycle Cassette Sprocket Set

This bicycle cassette consists of multiple sprockets designed for a range of gear ratios. It mounts on the rear wheel hub and works with the chain and derailleurs for shifting.

Product Overview

Professional Bicycle Cassette Sprocket Set

This bicycle cassette sprocket set is a high-performance drivetrain component engineered for optimal gear shifting efficiency. Featuring a multi-sprocket design with varying teeth counts, it provides riders with a comprehensive range of gear ratios suitable for diverse terrain and pedaling conditions. The unit is designed for secure mounting onto standard rear wheel freehub bodies, ensuring seamless integration with your existing transmission system.

Technical Details

Component Type	Bicycle Cassette
Primary Function	Drivetrain gear ratio adjustment

Compatibility

Mounting Type	Rear Wheel Hub Freehub Body
System Compatibility	Chain, Derailleur, Freehub
