

Bicycle Chain for Drivetrain

This bicycle chain is designed for optimal performance and durability. Its robust construction ensures reliable power transfer and smooth shifting for various bicycle types and riding conditions.

Product Overview

High-Performance Drivetrain Component

This high-quality bicycle chain is engineered for optimal performance and long-lasting durability. It features a robust construction designed to ensure reliable power transfer and smooth, consistent shifting across various riding conditions. Lightweight and built to high standards, this chain is an essential component for maintaining an efficient drivetrain.

Technical Specifications

Weight	520 grams
Country of Origin	China
