

Bicycle Chainwheel with Integrated Crank Arm

Bicycle chainwheel with integrated crank arm is designed for efficient power transfer in bicycle drivetrains. It features a multi-tooth configuration for smooth chain engagement and optimized gear ratios.

Product Overview

High-Efficiency Chainwheel System

This bicycle chainwheel with integrated crank arm is precision-engineered for efficient power transfer within bicycle drivetrains. It features a multi-tooth configuration designed to ensure smooth chain engagement and optimized gear ratios for various riding conditions. Built from durable, wear-resistant materials, this component is designed for long-lasting performance and includes a protective chain guard for added safety.

Technical Specifications

Model Number	CW-705009
Key Design Features	Integrated Crank Arm, Multi-tooth Configuration, Protective Chain Guard

Performance

Performance Benefits

- Optimized gear ratios for efficient power transfer
- Smooth chain engagement
- Wear-resistant construction
- Enhanced durability
