

Bicycle Dynamo Lighting Set

This bicycle dynamo lighting set includes a front headlight, a rear taillight, and a dynamo generator. The dynamo generator converts mechanical energy from the bicycle's wheel into electrical energy to power the lights.

Product Overview

Sustainable Cycling Illumination

This bicycle dynamo lighting set provides a reliable, eco-friendly solution for visibility in low-light conditions. The system utilizes a dynamo generator that converts mechanical energy from the bicycle wheel into electrical power, eliminating the need for batteries. Designed for classic and retro-style bicycles, the set includes a front headlight, a rear taillight, and all necessary mounting hardware.

Technical Specifications

Power Output

6 W Power Rating	12 V Voltage
----------------------------	------------------------

Included Components

- Front Headlight
- Rear Taillight
- Dynamo Generator
- Electrical Wiring
- Mounting Hardware

Installation Method

Friction-drive dynamo mount to bicycle fork

Key Features

Dynamo Powered, Battery-Free, Vintage Style, Chrome Finish
