

Bicycle Frame Lock Hardened Steel

This bicycle frame lock provides robust protection against theft. Constructed from hardened steel, it offers durability and resistance to cutting or prying.

Product Overview

Robust Security for Two-Wheelers

This high-security frame lock is engineered to provide reliable protection against theft for bicycles, e-bikes, and motorcycles. Constructed from hardened steel, the lock offers exceptional resistance to cutting and prying attempts, making it suitable for urban environments and high-risk areas. The design includes a protective coating to prevent corrosion and scratches, ensuring long-term durability and reliable performance.

Compatibility

Compatible Vehicles	Bicycle, E-Bike, Motorcycle
