

Bicycle Front Derailleur

This front derailleur is designed to shift the chain between different chainrings on a bicycle. It features a clamp-on mounting system for attachment to the frame and is constructed from metal for durability and precise shifting.

Overview

Precision Shifting Performance

This bicycle front derailleur is engineered for smooth and reliable chain movement between chainrings. Designed with a robust clamp-on mounting system, it ensures a secure fit on various bicycle frames. Constructed from high-quality metal components, this derailleur offers the durability and precision required for consistent shifting performance in diverse cycling conditions.

Technical Specifications

Mounting System	Clamp-on
Construction Material	Metal
Core Function	Chain guidance and shifting between chainrings
