

Bicycle Front Derailleur

This front derailleur is designed to shift the chain between different chainrings on the crankset. It features a clamp-on mounting system and adjustment screws for precise shifting.

Product Overview

Precision Shifting Performance

This bicycle front derailleur is engineered for smooth and reliable chain movement between chainrings. Featuring a versatile dual-pull design, it accommodates both up-pull and down-pull cable routing systems for broad compatibility. Its robust construction ensures consistent shifting performance, making it an essential component for maintaining drivetrain efficiency.

Technical Specifications

Pull Type

Up Pull • Down Pull

Component	Front Derailleur
Mounting System	Clamp-on

Design Features

Adjustment Features

- Precision adjustment screws
- Integrated chain guide cage
- Clamp-on frame interface

Finish	Chrome
