

Bicycle Lighting Set with Dynamo Generator

This classic bicycle lighting set includes a chrome headlight, a dynamo generator, a red taillight, and mounting hardware. The dynamo converts mechanical energy from the bicycle's wheel into electrical energy to power the lights.

Product Overview

Classic Bicycle Lighting Solution

This bicycle lighting set features a traditional dynamo-powered system designed for reliable illumination without the need for batteries. The kit includes a chrome-finished headlight, a rear taillight, and a mechanical dynamo generator that converts wheel rotation into electrical energy. It is an ideal lighting solution for vintage or classic bicycle restoration projects seeking an authentic, self-sustaining power source.

Technical Specifications

Included Components

- Chrome Headlight
- Dynamo Generator
- Red Taillight
- Mounting Hardware

Voltage Rating	12 V
----------------	------

Power Output	6 W
