

Bicycle Rear Derailleur

This rear derailleur is designed for bicycle drivetrain systems. It features a silver body, black cage, and red jockey wheels for smooth and reliable shifting.

Product Overview

High-Performance Rear Derailleur

This rear derailleur is engineered for bicycle drivetrain systems, providing smooth and reliable shifting performance across various terrains. Featuring a durable construction with a silver-colored body and a contrasting black cage, it is designed to integrate seamlessly into standard setups. The inclusion of red jockey wheels adds a distinct visual touch while ensuring consistent chain movement for an efficient ride.
