

Bicycle Rear Derailleur

This rear derailleur is designed for bicycle drivetrain systems. It allows for smooth and reliable gear changes across various bicycle types.

Overview

Precision Drivetrain Component

This rear derailleur is engineered for smooth, reliable gear transitions across a variety of cycling disciplines. Designed with an adjustable tension mechanism, it ensures consistent performance and is fully compatible with modern indexed shifting systems. Its durable construction and versatile design make it an ideal upgrade or replacement for mountain, road, and hybrid bicycles.

Technical Specifications

Key Features

- Adjustable tension
- Indexed shifting compatibility
- Durable drivetrain integration

Compatible Bicycle Types	Mountain Bike, Road Bike, Hybrid Bike
Shifting System	Indexed
Finish	Silver
