

Bicycle Rear Derailleur

This precision-engineered rear derailleur is designed for bicycles. It features a durable construction with a robust parallelogram design for smooth and accurate gear changes.

Overview

Precision Rear Derailleur

This precision-engineered rear derailleur is designed for reliable and smooth gear changes across diverse riding conditions. Featuring a robust parallelogram construction, it ensures accurate shifting performance and efficient power transfer. The integrated jockey wheel system is optimized to reduce friction, while the overall design prioritizes ease of installation and maintenance for professional mechanics and end-users alike.
