

Bicycle Roller Mower

This machine combines a roller mower with a four-wheeled bicycle. It offers both a bike driving mode and a motor-assisted driving mode for cutting grass.

Overview

Innovative Exercise Mower

The EM457 Exercise Mower is a unique fitness-focused lawn maintenance solution designed to combine outdoor activity with efficient grass cutting. Featuring a 36V DC motor and lead-acid battery system, it offers both manual bicycle propulsion and motor-assisted operation. This versatile unit includes adjustable settings for handlebars and saddle height, ensuring comfort during use while effectively maintaining lawn health with its roller and line blade system.
