

Bicycle Tail Light with Reflector

This bicycle tail light provides increased visibility and safety. It features a red reflector lens and is designed for mounting on the rear of the bicycle.

Product Overview

OEM Integrated Safety Solution

This bicycle tail light is engineered specifically for OEM integration, providing a seamless manufacturing solution for bicycle assembly. It incorporates a high-visibility red reflector lens, ensuring enhanced safety and signaling capabilities for riders in low-light conditions. Designed for durability and reliable performance, this component is an essential safety feature for modern bicycle production.

Technical Specifications

Application	OEM Solution
Visibility Features	Red Reflector, Rear Signal, Enhanced Safety
Mounting Location	Rear
