

Bicycle V-Brake Set

This high-performance V-brake set is designed for bicycles. It features durable aluminum alloy arms and high-friction brake pads to provide reliable stopping power.

Product Overview

High-Performance Bicycle V-Brake Set

This V-brake set is engineered from high-quality aluminum alloy to provide durable and reliable stopping power for a variety of bicycle models. Featuring high-friction brake pads, the system is designed for optimal modulation and precise control across diverse riding conditions. The set includes all necessary mounting hardware, ensuring a straightforward installation process for professional maintenance or upgrades.

Technical Specifications

Material

Aluminum Alloy

Color/Finish

Silver

Article Number

DM-KWC8

Brake Type

V-Brake

Features & Installation

Key Features

- Durable aluminum alloy arms
- High-friction brake pads
- Reliable stopping power
- Optimal modulation and control
- Easy installation

Included Components

Brake Arms, Brake Pads, Mounting Hardware
