

Bicycle Wheel Quick Release Skewer

This quick release skewer allows for easy bicycle wheel removal and installation without tools. It is suitable for front or rear wheel applications on road, mountain, and hybrid bikes.

Product Overview

Quick Release Wheel Skewer

This quick release skewer provides a reliable and tool-free solution for bicycle wheel installation and removal. Engineered with a robust steel rod and a secure cam lever mechanism, it ensures consistent clamping force for safe operation. Designed for versatility, this component is compatible with a wide range of cycling disciplines, including road, mountain, and hybrid bikes.

Technical Specifications

Wheel Position

Front Wheel • Rear Wheel

Material Construction

Steel rod with cam lever mechanism

Application Compatibility

Road Bikes, Mountain Bikes, Hybrid Bikes

Key Features

Included Components

- Steel rod
- Cam lever
- Nut
- Springs

Installation

Tool-free quick release
