

Big Blue Polyester Pleated Water Filter Cartridge

Big Blue Polyester Pleated Cartridges utilize polyester filter media for general water filtration, providing low pressure drop and high flow capacity. The pleated design increases surface area and improves filtration efficiency, while the washable and reusable construction adds convenience.

Product Overview

High-Performance Filtration

The Big Blue Polyester Pleated Water Filter Cartridge is engineered for high flow rate applications, offering exceptional dirt-holding capacity and an extended service life. Its durable polyester media provides superior chemical resistance and stability, making it an ideal choice for sediment removal and pre-filtration in residential, commercial, and industrial water treatment systems. The pleated design maximizes surface area to ensure efficient filtration while minimizing pressure drop and maintenance costs.

Technical Specifications

Filter Media	Durable Polyester
Design Features	Pleated Surface, High Flow Rate, Extended Service Life, Chemical Resistant
Compatibility	Standard Big Blue filter housings

Applications

Recommended Applications

- Residential water filtration
- Commercial water systems
- Industrial water treatment
- Sediment removal
- Pre-filtration
- Process water applications
