Product Overview

Professional Industrial Temperature Monitoring

This high-precision bimetal thermometer is engineered for reliable temperature measurement in demanding industrial environments. Constructed with durable stainless steel, it ensures longevity and consistent performance in various process applications. Designed for clarity and accuracy, the dial face allows for immediate, easy-to-read monitoring by technical operators.

Technical Specifications

Housing Material	Stainless Steel
Compliance Standard	EN 13190
Accuracy Class	CL1
Mounting	Direct mounting

Performance Metrics

Available Temperature Ranges

- 0 to 100 °C
- 0 to 120 °C
- 0 to 160 °C

Industrial Applications

Suitable Industries	Food & Beverage, Plumbing & HVAC, Chemical & Petrochemical, Hydraulics & Pneumatics, Water Treatment, Oil & Gas, Energy & Power
