

Biometric Fingerprint Time Attendance System

This biometric time attendance system accurately tracks employee clock-in and clock-out times. It utilizes fingerprint recognition, card reader, and keypad entry for versatile authentication.

Overview

Advanced Biometric Attendance Solution

The MX750 is a high-performance biometric fingerprint time attendance system designed for efficient workforce management. Utilizing the advanced Justouch algorithm, it ensures rapid and accurate fingerprint verification for reliable attendance tracking. This portable, standalone device supports multiple communication methods including TCP/IP and USB, making it an ideal choice for offices, factories, and commercial environments.

Capacity & Performance

Fingerprint Capacity	3000 users
Attendance Record Capacity	130000 records

Connectivity

Communication Interfaces	RS232, RS485, TCP/IP, USB
Web Online Tracking	Yes

Features

Verification Methods

Fingerprint • Card Reader • Keypad

Data Management

- Real-time record uploading
- Standalone operation (no PC required)
- Data export for payroll processing
- Multi-device support

Applications

Suitable Environments	Enterprise, Office, Factory, Bank, Restaurant
-----------------------	---
