

Biometric Fingerprint Time Attendance System

This biometric fingerprint system accurately tracks employee time. It records clock-in and clock-out times, providing data for payroll and attendance management.

Overview

Advanced Biometric Time Attendance

The MX530 is a high-performance, portable biometric time attendance system designed to streamline workforce management. Utilizing the industry-leading Justouch fingerprint algorithm, it offers exceptionally fast and accurate verification for secure employee tracking. This standalone device supports large-scale data storage and flexible connectivity options, making it an ideal solution for diverse environments including offices, factories, banks, and restaurants.

Performance Metrics

Fingerprint Capacity	3000 users
Attendance Record Capacity	130000 records

Technical Specifications

Key Features

- Standalone operation (no PC connection required)
- Real-time record uploading
- WEB online tracking for multi-device management
- High-speed biometric verification

Connectivity Options	RS232, RS485, TCP/IP, USB
----------------------	---------------------------

Applications

Ideal For

Enterprise • Office • Factory • Bank • Restaurant
