

Black Ball Grill Dynamic Microphone

This dynamic microphone features a black ball grill and a painted metal body. It is designed for vocal and speech applications, and incorporates an on/off switch for convenient control during use.

Overview

Professional Dynamic Microphone

The Black Ball Grill Dynamic Microphone is a robust audio solution designed for professional vocal and speech applications. Featuring a durable metal body with high-quality spray painting, this microphone is built to withstand rigorous use in live settings. Its uni-directional pickup pattern and wide frequency response ensure reliable, clear sound reproduction for everything from KTV installations to stage performances and public speaking engagements.
