

Black GPPS Plastic Pellets

High-quality black GPPS (General Purpose Polystyrene) plastic pellets are suitable for injection molding and extrusion. These pellets offer excellent flow properties for producing a wide range of plastic parts and components.

Product Overview

Black GPPS Plastic Pellets Overview

These high-quality black General Purpose Polystyrene (GPPS) plastic pellets are engineered for reliable performance in injection molding applications. Featuring a smooth, grain-based appearance, these pellets are designed for direct production use, ensuring efficient manufacturing processes. Their consistent material properties make them an ideal choice for creating durable plastic parts and components.

Material Properties

Color	Black
Appearance	Smooth
Shape	Grain

Usage & Processing

Processing Level	Ready for direct production	
Primary Usage	Injection Molding	

Origin & Logistics

Source	Malay	
Product Type	Shuikou
