

Black Hex Bolts with Nuts

These are DIN933/931 hex bolts paired with DIN934 hex nuts. They feature a black finish.

Product Overview

High-Strength Structural Fasteners

These heavy-duty hex bolts and nuts are engineered for demanding applications in construction, infrastructure, and machinery. Manufactured from high-grade steel, they are designed to provide exceptional tensile strength and reliable shear resistance. Finished in black for consistent performance, these fasteners are suitable for connecting critical structural components like steel beams and columns.

Technical Standards

Bolt Standard	DIN 933, DIN 931
Nut Standard	DIN 934

Material & Finish

Surface Finish	Black Finished
Material	High-grade steel
