

Black Phosphate Bugle Head Drywall Screws

These black phosphate drywall screws are designed for attaching drywall to wood or metal studs. They feature a sharp point for easy penetration and a bugle head for flush seating.

Product Overview

Professional Grade Drywall Fasteners

These Black Phosphate Bugle Head Drywall Screws are engineered for reliable performance in construction and renovation projects. Featuring a high-hardness design with excellent temperature resistance, they are optimized for securing drywall panels to wood or metal studs. The signature bugle head design ensures flush seating without damaging the paper surface, providing a smooth finish for walls and ceilings.
