

Black Phosphate Drywall Screw

This drywall screw has a black phosphate coating and coarse thread. It is designed for efficient fastening into drywall and similar materials.

Product Overview

Professional Grade Drywall Fastening

The Black Phosphate Drywall Screw is engineered for efficient and reliable fastening in construction and interior finishing projects. Featuring a distinctive bugle head and sharp point, this screw is optimized for quick penetration into drywall and soft materials. The black phosphate coating provides essential corrosion resistance while minimizing glare for a clean, professional finish.

Technical Specifications

Coating

Black Phosphate • Corrosion Resistant

Head Type	Bugle Head
Point Type	Sharp Point
Thread Design	Coarse Thread

Application

Suitable Applications

- Drywall Installation
- Interior Construction
- DIY Projects
- Fastening to Soft Materials
