

# Black Plastic Electronic Component Mount

This black plastic component provides structural support. It features multiple mounting points and a central aperture, making it suitable for electronic assemblies.

## Product Overview

### Structural Electronic Component Mount

This black plastic electronic component mount is engineered for robust structural support in precision electronic assemblies. Featuring a specialized gridded support architecture, it offers high structural integrity while maintaining a lightweight profile. Designed for versatility, the unit includes multiple mounting points and a central circular aperture to facilitate streamlined component integration.

## Physical Characteristics

Color	Black
Material	Industrial-grade plastic

## Design Features

Structure Type	Reinforced • Component Housing
Mounting Options	Multi-point mounting, Central aperture, Gridded support
