

Black Soybeans with Green Kernel

Black soybeans are characterized by their dark outer layer and unique green kernel. These soybeans are commonly used in various culinary applications and valued for their nutritional properties.

Product Overview

Premium Black Soybeans with Green Kernel

These high-quality black soybeans are distinguished by their vibrant green kernels, a hallmark of superior agricultural standards. Carefully selected for their nutritional profile and culinary versatility, they are an excellent choice for health-conscious food processing and manufacturing. This product is ideal for applications requiring consistent color, texture, and natural flavor profiles.
