

Bladeless Air Circulator Fan

This bladeless air circulator fan operates at 220V and consumes 35W of power. It features stepless speed regulation and offers a choice of ordinary, natural, and sleep wind modes.

Product Overview

Modern Bladeless Air Circulation

The Bladeless Air Circulator Fan offers a sleek, modern alternative to traditional bladed fans, utilizing advanced air multiplier technology to generate a smooth and uninterrupted airflow. Its innovative bladeless design enhances safety for homes with children or pets while ensuring maintenance is quick and easy. With stepless speed regulation and multiple wind modes, this fan provides efficient, quiet, and personalized cooling for any environment.
