

Blow Molding Machine for Plastic Containers

This blow molding machine is designed for the efficient production of plastic containers. It features a robust construction and precise molding capabilities, suitable for manufacturing bottles and jerrycans.

Overview

High-Performance Blow Molding Solution

The CSD-EBS-J2 is a high-performance blow molding machine engineered for the efficient production of plastic containers. Featuring a robust construction and an advanced control system, it delivers precise molding capabilities for a variety of hollow plastic items, including bottles and jerrycans. Its modular design supports flexible configuration and seamless integration with auxiliary equipment, ensuring reliable, high-speed production cycles for demanding industrial environments.

Technical Specifications

Key Features

- Adjustable mold clamping force
- Precise temperature control
- High-speed production cycles
- User-friendly operation interface
- Modular design for auxiliary integration

Model Number

CSD, EBS65J2-A6

Capabilities

Performance Highlights

1 High

Production Efficiency

1 User-friendly

Operation

Suitable Applications

Plastic Bottles, Jerrycans, Hollow Plastic Items
