

Blower Fan for Abrasive and Grinding Systems

This blower fan is designed for abrasive and grinding systems. It features a durable construction for long-lasting operation and efficient airflow.

Product Overview

High-Performance Blower Fan

This high-performance blower fan is specifically engineered for demanding environments such as abrasive and grinding systems. Its durable construction ensures long-lasting operation, while the compact design facilitates seamless integration into existing industrial setups. Designed to provide efficient, reliable airflow, it is an ideal component for electric tools and specialized accessories.

Technical Specifications

Operating Voltage

24 V

Voltage

Rated Current

0.45 A

Motor Technology

DC Brushless

Device Type

Blower

Application & Usage

Key Features

- Durable construction for longevity
- Compact design for easy integration
- Efficient airflow performance

Primary Applications

Abrasive Systems, Grinding Systems, Electric Tools, Industrial Accessories
