

Blue Lightning Pistons

These are pistons for auto engine systems. The pistons are sometimes referred to as Blue Lightning pistons.

Product Overview

High-Performance Urethane Bonded Pistons

These urethane bonded pistons are engineered for demanding industrial applications, featuring multi-ply fabric reinforced backings that ensure positive, wear-resistant seals. The vulcanized polyurethane rubber construction provides superior shock resistance, allowing for reliable operation under high working pressures and frequent movement. Designed for versatility, these pistons deliver excellent performance across various mud compositions and pressure requirements.

Technical Specifications

Construction Features

- Multi-ply fabric reinforced backings
- Vulcanized polyurethane rubber
- High shock resistance
- Wear-resistant seal design

Performance Capabilities

100 %

Shock Resistance Rating

Product Variants

Available Urethane Piston Types

Blue Lightning, White Lightning, Green Duo, Slip Seal Bullitt, Supreme Bonded

Compatibility

Suitable for diverse working pressures and varying mud compositions.
