

Bluetooth 2.1 Channel Speaker System

This speaker system features Bluetooth 2.1 connectivity for wireless audio streaming. It delivers enhanced sound quality with its 2.1 channel configuration.

Overview

Bluetooth 2.1 Channel Speaker System

This 2.1 channel speaker system delivers a balanced audio experience, combining a dedicated subwoofer for deep bass with stereo satellite speakers for clear mid and high frequencies. Designed for versatility, it features wireless Bluetooth connectivity, allowing for seamless streaming from various devices. It is an ideal audio solution for professional office environments, waiting areas, or small conference rooms requiring reliable sound performance.
