Product Overview

Smart Body Composition Monitoring

This advanced body composition analyzer utilizes BIA biometric technology and four high-precision sensors to provide accurate health tracking. Beyond simple weight measurement, the scale synchronizes over 18 detailed health metrics with a dedicated mobile app. Designed with a sleek ITO glass platform and a white backlit LCD, it combines aesthetic appeal with professional-grade functionality for comprehensive fitness management.

Measurement & Performance

Capacity and Precision

180 kg

Max Capacity

100 g

Division

Tracked Health Indicators

Weight, BMI, Body Fat %, Water Content %, Muscle Mass, Bone Mass, KCAL, Protein Rate, Metabolic Age, Visceral Fat

Technical Specifications

Dimensions and Build

- Platform: 6mm Tempered Glass
- Dimensions: 319x319x24mm
- Display: 70x30mm LCD with White Digitals
- Sensors: 4 Precision Strain Gauge

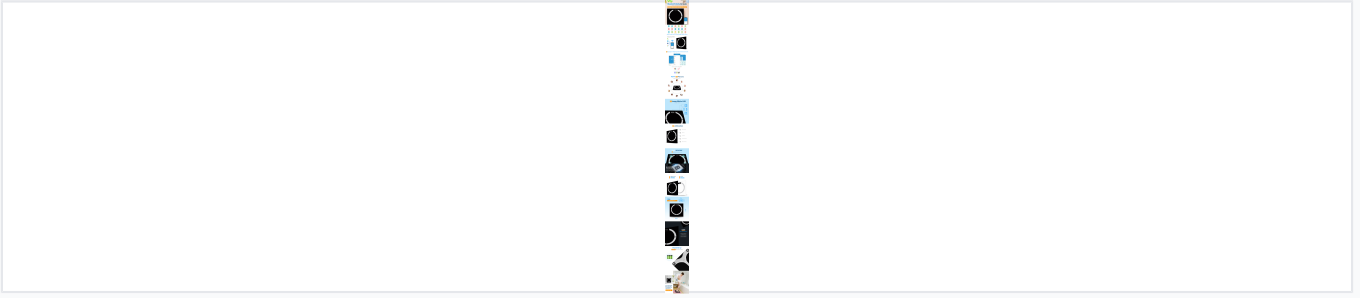

Connectivity

Bluetooth 4.0 with Auto-Connection

Power Requirements

3x AAA Batteries (Included)

Smart Features

Comprehensive health dashboard featuring 18+ metrics and smart app connectivity.

App Capabilities

- Multiple User & Guest Mode
- Data Sync: Google Fit & Apple Health Kit
- Social Sharing: Facebook & Twitter
- Automatic User Recognition
