Product Overview

High-precision BIA biometric technology provides 18+ health indicators.

Smart Body Composition Analysis

This advanced body composition scale utilizes high-precision strain gauge sensors and ITO-coated tempered glass to deliver highly accurate health insights. It seamlessly integrates with the Dr. Weight mobile application via Bluetooth to track over 18 essential body metrics, including muscle rate, visceral fat, and protein levels. Designed for home use, it features a clear white LED display, ergonomic rounded corners, and reliable automated power management.

Technical Specifications

Physical Build

Attribute	Detail
Platform Material	5mm ITO Tempered Glass
Dimensions	280 x 280 x 22mm
Display Type	White LED
Digit Height	28mm

Measurement Capability

180 kg

Max Capacity

100 g

Graduation

8 users
