

BNC Coaxial Cable Adapter

This adapter is a BNC (Bayonet Neill-Concelman) connector, commonly used for coaxial cables. It allows connection between two cables with BNC connectors in applications such as video signals, radio frequency (RF) signals, and test equipment.

Overview

Professional BNC Coaxial Adapter

This BNC male quick-connect adapter is designed for reliable signal transmission across a variety of coaxial cable types, including RG58, RG59, and RG6U. Featuring a knurled metal body, it ensures a secure grip for easy manual tightening and loosening in professional environments. It is an essential component for video signals, RF applications, and test equipment setups requiring durable performance.

Technical Specifications

Connector Type	BNC Male Quick C-Type
----------------	-----------------------

Compatibility

Compatible Cable Types	RG 58, RG 59, RG 6 U
------------------------	----------------------

Design & Build

Body Construction	Knurled Metal
Coupling Mechanism	Bayonet Neill-Concelman (BNC)

Applications

Primary Applications

- Video Signal Transmission
- Radio Frequency (RF) Signals
- Electronic Test Equipment
- Professional & Consumer Electronics

Key Features

Performance Features

Quick Connect • High Durability • Reliable Signal • Secure Grip
