

Boiled Bristle Brush Component 60%

Cylindrical brush featuring black bristles boiled at 60% and a silver-colored metal ferrule. The bristles are densely packed and of uniform length.

Product Overview

Boiled Bristle Brush Component

This high-quality brush component features 60% boiled bristles, engineered for consistent performance in industrial or professional applications. The design incorporates a durable, silver-colored metal ferrule that ensures structural integrity and secure attachment. With densely packed, uniform bristles, this component is optimized for precision material application and manipulation.

Technical Specifications

Bristle Treatment	Boiled
Bristle Ratio	60 %

Design & Build

Ferrule Type	Metal
Ferrule Finish	Silver
Bristle Color	Black
