

Bonded Square Magnet

Bonded square magnets are high-performance magnetic components. They are suitable for applications requiring precise magnetic fields and reliable performance.

Product Overview

High-Performance Bonded Magnets

These bonded square magnets are engineered for applications requiring high precision and reliable magnetic performance. Manufactured with high-quality materials and tight tolerances, they ensure consistent and repeatable results in diverse industrial environments. Their robust construction makes them suitable for a wide range of magnetic assembly needs.

Technical Specifications

Dimensional Specifications

Part Number	Length (mm)	Width (mm)	Height (mm)
P701	9	4.5	3
Magnet Type	Bonded		
Shape	Square
