Product Overview

High-Efficiency Bottled Product Weighing Scale

This modular weighing scale is designed to enhance productivity and streamline quality control processes for bottled products. Featuring a robust SUS304 stainless steel construction, it offers simple maintenance and superior hygiene standards. With a user-friendly 10-inch touch screen and up to 200 product presets, this system enables rapid switching between production lines, ensuring high throughput and precision.

Performance Metrics

Key Performance Indicators

150 pcs/min

Throughput

1 g

Accuracy (3 σ)

0.1 g

Minimum Scale

Technical Specifications

IP Grade

IP-65

Weighing Range

1000 g

Construction Material

SUS304 Stainless Steel with surface polishing

Power Requirements

AC 200V-240V (110V/380V available on request)

System Configuration

Language Support

Chinese, English, Turkish, Spanish

Dimensions

Physical Dimensions

Component	Dimensions
Overall Equipment	L2000mm x W750mm x H1360mm
Weighing Section Belt	L300mm x W130mm
Conveyor Belt Height	650mm - 750mm
