

Bottleless Water Dispenser with Filtration

This water dispenser provides convenient access to chilled or room temperature water. Featuring a sleek, modern design, it is suitable for home or office use.

Product Overview

Professional Grade Bottleless Filtration

This bottleless water dispenser provides a continuous supply of filtered water by connecting directly to your existing water line, eliminating the need for bulky replacement bottles. Equipped with advanced reverse osmosis filtration and a high-performance booster pump, it ensures consistent flow and superior water quality. Designed for reliability in home or professional settings, this system features robust stainless steel components and an automated maintenance flushing system.

Filtration System

Filtration Components

- 5u PP Sediment Cartridge
- 50GPD Osmonics & Cerlin RO Membrane
- Activated Carbon Post-filter (Big T)
- Activated Carbon Post-filter (Small & Long)

Membrane Capacity

50 GPD

RO Membrane Rating

Technical Specifications

Pump & Electrical

Component	Rating
Transformer	24V/220V, 1.2A
Booster Pump	24V, 1.2A
Solenoid Valve	24V

Key Features

Auto Flush Valve, Low Pressure Controller, Stainless Steel Tube, Plasteel Check Valve
