

Bottless POU RO Water Dispenser

This bottless point-of-use (POU) water dispenser utilizes reverse osmosis to provide purified water. It offers both hot and cold water options and connects directly to a water line, eliminating the need for bottles.

Overview

Professional POU Water Dispenser

The YL-01 is a standing Point-of-Use water dispenser designed for efficient hot and cold water delivery in professional or home environments. This unit connects directly to water lines, eliminating the need for bulky bottles while utilizing a comprehensive five-stage filtration system for purified water. Built with high-quality, food-grade materials and a robust compressor cooling system, it offers a reliable, low-noise solution for daily hydration needs.

Performance Metrics

Heating Performance

550 W

Heating Power

5 L/h

Hot Water Output

Cooling Performance

100 W

Cooling Power

2 L/h

Cold Water Output

Technical Specifications

Electrical Requirements	220-240V / 110-127V, 50Hz / 60Hz
Refrigerant	R134a or R12
Inner Vessel Material	Stainless Steel

Filtration System

Filtration Stages

- PPF precipitation element
- CTO extruded active carbon
- UDF particle active carbon
- RO membrane
- T33 rear active carbon

Logistics

Container Load Capacity

Container Type	Quantity
20' FCL	192
40' FCL	396
40' HQ	396

Box Dimensions	390 x 360 x 1,000 mm
----------------	----------------------

Gross Weight	15 kg
