

Bottom-Freezer Refrigerator

This bottom-freezer refrigerator is designed for efficient cooling and storage. It features a multi-layer shelving system and adjustable temperature controls for optimal food preservation.

Product Overview

Efficiency Meets Accessibility

The BCD-220 is a professional-grade bottom-freezer refrigerator designed to balance efficient cooling performance with optimal storage organization. Featuring a dedicated bottom-mounted freezer, it prioritizes ergonomics by placing frequently accessed refrigerator contents at eye level. The unit incorporates an energy-efficient cooling system and adjustable temperature controls, ensuring both operational savings and ideal food preservation conditions for any kitchen environment.
