

Bottom Freezer Refrigerator

This refrigerator is designed with a bottom freezer and a top refrigerator compartment. It provides efficient cooling and organized storage with adjustable shelves and door compartments.

Product Overview

Modern Cooling Solution

The BCD-209ZM2 SP is a versatile bottom-freezer refrigerator designed for efficient household cooling. Featuring a sleek white exterior with silver accents, this appliance combines reliable performance with organized storage options, including adjustable shelves and a dedicated crisper drawer. Its user-friendly top-mounted control panel ensures precise temperature management, making it an ideal choice for modern kitchens.
