

Bottom-Freezer Refrigerator with Adjustable Shelves

This bottom-freezer refrigerator is designed for efficient cooling and convenient storage. Its interior features adjustable shelves, door racks, and crisper drawers to maximize organization and preserve food freshness.

BCD-225

Product Overview

Efficient Bottom-Freezer Design

The BCD-225 is a professional-grade bottom-freezer refrigerator engineered for superior cooling efficiency and organized storage. Its intuitive two-door configuration places the refrigerator compartment at eye level for convenient access, while the bottom freezer maximizes utility for frozen goods. Designed for compact footprints, this unit offers flexible internal storage solutions including adjustable shelves and dedicated crisper drawers to maintain optimal freshness.

Key Features

Core Capabilities
