

# Bottom Loading Freestanding Water Dispenser

This water dispenser features bottom loading for easy bottle replacement. It offers hot, cold, and room temperature dispensing options.

## Overview

### Professional Bottom-Loading Water Solution

This freestanding water dispenser is designed for convenience and hygiene, featuring a bottom-loading mechanism that eliminates the need for lifting heavy bottles. Equipped with both heating and cooling functions, it provides instant access to hot, cold, and room-temperature water. Built with high-quality materials including SUS304 stainless steel tanks and food-grade silicon pipes, this unit ensures safe and reliable water delivery for professional environments.
