

Bow and D-Shackles

These bow and D-shackles are designed for lifting, rigging, and connecting applications. The shackles are made from durable materials and provide reliable performance for use in construction, marine, and industrial environments.

Product Overview

High-Strength Lifting Solutions

These bow and D-shackles are engineered for critical lifting, rigging, and connection applications. Constructed from durable, high-strength materials, they are designed to deliver reliable performance even in the most demanding industrial environments. Their robust build ensures safety and longevity across construction, marine, and heavy-duty industrial settings.

Technical Specifications

Primary Applications

- Construction
- Marine Rigging
- Industrial Lifting
- Heavy-duty connections

Key Features

High-Strength • Durable Construction • Versatile Sizing • Reliable Load Capacity

Available Types

Bow Shackle, D-Shackle
