

Bowling Ball Return System

This bowling ball return system automatically returns bowling balls to the bowler. It features a ball lift mechanism, track, and storage area, constructed from durable materials for long-lasting performance.

Product Overview

Automated Bowling Ball Return System

This professional-grade bowling ball return system is engineered for high-traffic environments, including bowling alleys and recreational facilities. The system features a robust ball lift mechanism, a smooth return track, and an integrated storage area to ensure seamless gameplay. Designed for durability and consistent performance, it is fully compatible with all standard bowling ball sizes and weights.

Technical Specifications

Included Components
