

Bowling Pin Setting Machine

This machine automatically resets bowling pins. It uses an intricate system of rods and levers to precisely position bowling pins on the lane.

Product Overview

Automated Pin Setting Solution

This bowling pin setting machine is an engineered, robust system designed for high-reliability automated pin resetting in bowling alleys. Featuring a precise overhead mechanism with intricate rods and levers, it ensures accurate pin placement in the standard triangular formation. This solution is built to withstand the rigors of continuous operation while maintaining consistent performance for every frame.

Technical Specifications

Mechanism Type	Overhead pin placement system
Pin Formation	Standard triangular
Construction Features	Robust design, Automated, High-precision levers, Engineered supports

Performance Metrics

Operational Status
Ready for Operation
